

SCIENCE CLUB

President	Tim Brown
Vice-President	Ken Archibold
Secretary	Nancy Wolfe
Treasurer	Bud Soden
Faculty Advisor	Edward Stolt

SCIENCE CLUB

Under the advisory direction of Mr. Stolt, this organization provides a valuable outlet for the more scientific minded students of our school. Its meetings, held twice monthly, are usually filled with one or another interesting experiment. One of the unique features of this organization is the fact that it is broken up into small groups which work independently of each other in some specialized field of science. There are sections devoted to zoology, botany, chemistry, and physics. These groups have provided time for the members to devote more of their attention to a specialized field. Under Mr. Stolt's direction, the group has taken various field trips which have proved most interesting.
