

*You don't always draw in Mechanical Drawing.*

*"Do you think it's out of gas?"*

LEFT TO RIGHT: John Herbert, M.Ed.; Raymond L. Moore, Ind. Arts; John Libertazzo, B.S.; Clifford Crawley, B.S.; Roger Pedersen, B.S.

## INDUSTRIAL ARTS

*Mr. Raymond Moore*

Here the student can learn a trade or an interesting hobby. In woodshop he learns the uses of tools and gains practical experience from working on different projects. In metal shop the boys are taught how to make metal, both useful and ornamental. Mechanical drawing instructs on making and reading blue prints. Older boys take the course of auto shop where they can repair their cars. Industrial arts teaches the student the value of manual labor. This growing department is a valuable asset to S.P.F.H.S.

*"Do it yourself."*
