DRIVER EDUCATION

Mr. Earl Smith

With an increased rate in accidents, a greater emphasis has been put on safety when driving. From this Driver Education has evolved. Here the students learn the safest, most economical, and best way to drive.

Because of the demand for this course, it has been broken down into two parts. Classroom instruction, which involves rules and procedures while driving, is taught in Safety. Behind-the-wheel training is retained by the Driver Education class.

"What a thrill to take the wheel . . . only to be braked by E. Smith's heel."

NURSING

Miss Jeanne Hazley

Used for first aid, testing, and teaching, the Nursing Department of SPFHS never has a dull moment. First aid is available to all students and faculty members upon injury on or around the school grounds. The department gives: eye and ear tests for Sophomores, physical examinations for Freshmen and Juniors, and X-rays for the entire student body and staff. Dental examinations are also available. Miss Hazley also teaches First Aid and Home Nursing to Sophomore girls.

Jeanne Hazley, B.S., our nurse, takes a temperature.
