

FIRST ROW, left to right: S. Walters, G. Sheelen, M. Risley, C. Tullsen.
 SECOND ROW: G. Gross, T. Dangelo, J. Randel, F. Lanahan, K. Dunlap.

ADVANCED BIOLOGY CLUB

For those students who made it through one formaldehyde-ridden year of elementary biology and perhaps had the daring to take Advanced Biology, this club is designed. The membership of Advanced Biology Club is small, and individual projects, rather than group meetings, are stressed. Mr. Stolt is always ready and willing to help and give advice in these projects.

LEFT TO RIGHT: D. Schermund, D. Post, J. Boyd, R. Muessig, Mr. Froncek.

SCIENCE CLUB

SCIENCE CLUB OFFICERS

<i>President</i>	John Boyd
<i>Vice President</i>	Dook Schmermund
<i>Secretary</i>	Ralph Branch
<i>Treasurer</i>	Richard Muessig
<i>Adviser</i>	Mr. Froncek

Supermen of science are developed under the guidance of Mr. Froncek in this club. Freshmen students study in detail the fields of science dealt with in General Science class. Can you imagine Freshmen students balancing chemical equations? Through the further understanding of science gained outside the classroom, a member of this club enriches his education for a better world to come.
