

FIRST ROW, left to right: R. West, P. Thomas, R. Berthold, A. Frederick, S. Gautier. SECOND ROW: Mr. Tilley, G. Nechwort, A. Fornwald, W. Anderson. THIRD ROW: T. Lasher, R. Cole, B. Butler, T. Gurske.

ADVANCED CHEMISTRY CLUB

One year in the chemistry lab wasn't enough for these energetic Seniors, who are now trying to outdo last year's smells and explosions. The meetings take many forms, but are always stimulating and informative. Under the competent guidance of Mr. Tilley, this group has broadened their knowledge considerably. College chemistry should be easier for these students, and perhaps one of them will discover a new element (Scotch Plainsium?).

PHYSICS CLUB

If something goes up, must it come down? Physics students from a special physics class, the Physical Science Study Committee, attend this class-after-class-type club. The material taught is being learned by other physics classes during the regular class period.

FIRST ROW, left to right: A. Fornwald, R. West, J. Randel. SECOND ROW: W. Anderson, T. Gurske. THIRD ROW: D. Cole, B. Butler, C. Arendsee, G. Nechwort.
