"I hope Orville will like it this time."

INDUSTRIAL ARTS

RAYMOND MOORE

The Industrial Arts Department offers a wide variety of courses. These include Mechanical Drawing, Woodwork, Metal work, and Auto Mechanics. In each class the student begins with the basic work and progresses up to more difficult skills. It is in this phase of schooling that one can learn to repair automobiles, make blueprints, and gain useful experience in manual labor.

hard at work

I wonder what that's for.
