DRIVER EDUCATION

EARL SMITH

The aim of the Driver Education Course is to teach students correct techniques in the handling of a car. In order for students to become skillful drivers, instruction is given in parallel parking, "K" turning, and correct driving procedures. Finally the big moment arrives when the student gets that coveted slip of paper—a license.

darkness descends

promise her anything.

NURSING

JEANNE HAZLEY

Most of the upperclass girls probably remember Mrs. Chase and Baby Chase, models of the most fashionable bandages and splints. Although the Nursing Department is no longer responsible for the teaching of First Aid, it still maintains a busy schedule. The department administers physicals, eye and ear tests, dental examinations, and X-rays. It is first on the scene of any accident at S.P.F.H.S. and from our nurse, any student or faculty or personnel member may receive first aid treatment and advice on their personal health problems.
