

"I know what it's SUPPOSED to be."

## ART

### Art Department

Expression and creation are two things that are cultivated in this year's art classes. It is a period where the student may relax, but also incorporate the skills he has learned in printing, painting, drawing, copper enameling and ceramics.

Combining ingenuity and imagination with the basic skills brings out a person's true culture. With an abundance of art supplies, the student is able to construct and build in any media he desires.

Under the excellent guidance of the instructor, one leaves the period with the gratifying knowledge of something beneficial being accomplished!

University of Scranton, B.S.

"So what if I only comprehend ten percent of the sixty words that I read per minute."

## READING

### David Evans

This program, which was innovated in 1955, began as an experimental course and now has become an indispensable part of our system. The classes are small, and each student is allowed to work at his individual rate, improving such things as comprehension, speed and study methods. New facilities and ideas are being introduced constantly as this well-liked course expands.
