Colorado University
Montclair State Teachers' College
B.A.

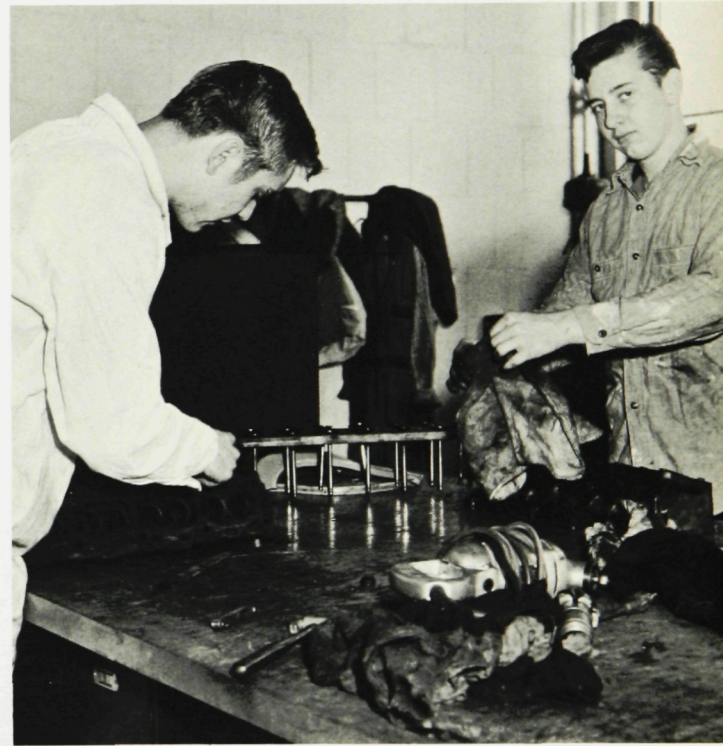

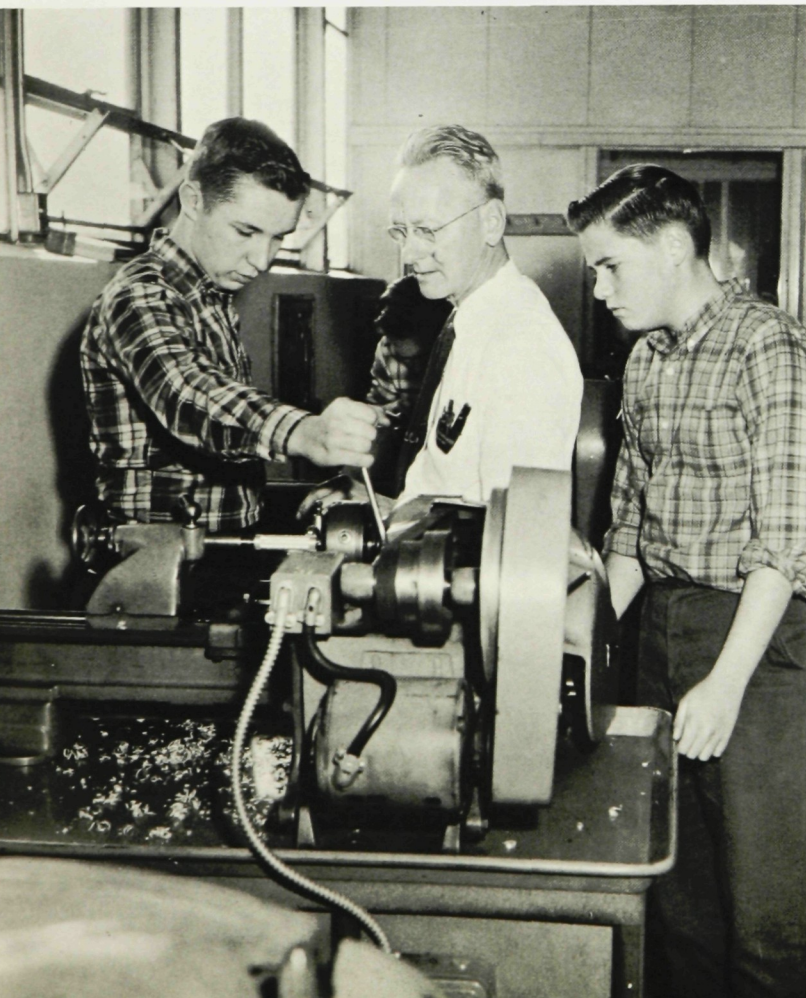

Russell Herbert
State Teachers' College, B.S.
Rutgers University, M.A.

"I still think it looks like a squashed-out circle."

INDUSTRIAL ARTS

"If you push this lever, I'll be able to remove my hand."

"What's this thing do?"

Mr. Raymond L. Moore

Mechanical drawing, and the wood, metal, and auto shops give students an opportunity to work with their hands in order to create the tangible necessities and luxuries. Here in this vocational wing, such creativity is practiced with the sawdust, axle grease, and steel wool—the results of which are pleasing to both creator and perceiver alike. In auto shop it is possible to take apart a car and reassemble it with an interminable meshing of gears and the imagination. Carpentry training can be yours in the wood shop; in mechanical drawing one is able to plot anything from hexagons to factories.
