## HOME ECONOMICS

*Mrs. Tressa D. Perry*

Most of the girls in this high school will become the homemakers of tomorrow. The Home Economics Department not only teaches a young lady how to cook a fantastic meal, but also how to budget it properly. She will learn how to sew a straight seam and be able to cope with family problems in the future. It is the purpose of the instructors to prepare students for the years ahead. This training is useful and important whether it be in the Foods, Clothing, or Family Living classrooms.
