

FIRST ROW, left to right: V. Murphy, L. Williams, A. Kuchta, M. Butler. SECOND ROW: N. Maddock, M. Borleis, K. Sikucinski, S. Winterhalter, J. Kellogg, P. Collins. THIRD ROW: C. Russell, S. Hartman, D. Hegyes, B. Littman, M. Cullinane. FOURTH ROW: J. Douthert, H. Gilbert, L. Frank, G. Hess, M. Maros, C. Dengel.

ADVANCED BIOLOGY CLUB

Mr. Stolt

The Advanced Biology Club is an especially popular one among the many Seniors taking the Human Physiology course. Their work takes them deeper into the things they are studying in their classes. At various times of the year you may find them engaged in making slides, dissecting, or numerous other projects. Under the able direction of Edward Stolt, the Advanced Biology Club, a recent addition to our long list of activities, has become most valuable to those students interested in this field.

FIRST ROW, left to right: T. Ethridge, R. Ferraro, M. Horbelt, W. Remas, S. Haverland. SECOND ROW: D. Kisner, R. Branch, M. Smith, D. Field. THIRD ROW: L. Soderberg, B. Beam, D. Firstenberg, R. Rahn, G. McDonald.

ELEMENTARY CHEMISTRY CLUB

"Hey! It melts!" This, and other exclamations of surprise are often heard coming from the Chemistry room after school on Fridays. Here, those students who are sincerely interested in Chemistry can be found tinkering around with test tubes, beakers, and Bunsen burners. This club affords students the opportunity to learn more about Chemistry than is normally covered in the classroom, and to prepare them for a fuller future.
