

FIRST ROW, left to right: M. Menard, R. Tilley, H. Swerdlove. SECOND ROW: G. Wilson, C. Wood, B. Rohr, B. Osmun.

ADVANCED CHEMISTRY CLUB

Some of our more talented Chemistry students get together to try out new combinations of elements — sometimes unsuccessfully. But, nevertheless, they try, and under the leadership of Mr. Tilley, will be the chemists and scientists of our generation. These students are interested in delving more deeply into the world of beakers and test tubes and thus spend much time after school developing their skills.

"Did you say A.C. Current?" This might be a question which would quickly get the attention of members of this organization. These people are students of the P.S.S.C. Physics Course. They become members of this club in order to further their knowledge of this fascinating course. During their meetings they attack problems which are not usually found in the regular Physics course.

PHYSICS CLUB

FIRST ROW, left to right: R. D'Arconte, J. McGill, B. Poulsen, Mr. Tilley. SECOND ROW: G. Jenckes, J. Torkelsen, S. Blazo. THIRD ROW: B. Schwartz, B. Zaumen, R. Anderson, R. Poh.
