"Ah, the pulsating excitement of mechanical drawing!"

INDUSTRIAL ART

Raymond L. Moore

In the four shops of this department, students gain an introduction to the industrial world through the use of tools and materials. They learn to apply knowledge gained from other classes to industrial problems.

A basic understanding of graphics is taught in mechanical drawing. Mechanics and auto repair is put to practical use in the auto shop. In woodwork and metal shop, the boys learn manual co-ordination and mechanical skills.

We owe much thanks to the capable teachers of this department. Through their guidance we are better prepared to meet and overcome many future problems.

"... under the spreading chestnut tree ..."

"... only the hubcap, stupid! ..."
