Mrs. Tressa D. Perry

How efficient will the future homemakers be? The girls from our Home Economics Department will rate highly because of their valuable training. The clothing classes prepare a young lady for a full wardrobe on a slim budget.

Meal preparation, nutrition, and proper use of equipment is taught in Foods.

In Family Living, a better understanding of home problems and our goals are considered.

Whether it's planning a party or making a prom dress, each young lady is prepared for the best results. Today, Home Economics goes beyond the basic skills and is a vital influence in modern living.

HOME
ECONOMICS

"... If I don't get this done by Saturday night ..."

"They tell me it's low in poly-unsaturates ..."

Family Living classes pose an important question.
