DRIVER EDUCATION

Mr. Earl Smith

Those brand new 1963 Pontiacs you see parked in front of the school would, at first glance, seem to belong to a visiting town official, but upon closer inspection, one can see the words "Driver Education" written on the doors. These are the cars that this year's Driver Education students were fortunate to drive.

For the students taking this course, the names Hyde Place and Johnston Drive will have a familiar ring and even more so for the teachers who take the students over their course, instructing them in general rules of the road as well as K-turns and parallel parking.

This year, along with the efforts of Mr. Smith and Mr. Petrulla, we were fortunate in having a new teacher, Mr. Samsky, to help handle the ever increasing number of students who wish to take this popular course.

"... 6 1/8 inches—too bad, you fail..."

"... like I always say—Good posture is the key to good health!..."

HEALTH

Mr. Bruce Morgan

Thanks to the able direction of Mr. Morgan, the burden of health classes has been lifted from the shoulders of our gym teachers. This new system provides for a six-week course in health, safety, and driver education. Sophomores and juniors leave regular gym periods to attend classes held five days a week in the auditorium. This required course teaches students how to use first aid in times of emergency and prepares juniors for the written driver examination given by the state in the spring.
