## LIBRARY

*A. Loraine Ayers  
Isabel M. Turner*

Sh! Within these walls lies the knowledge of the world. One need only to look around to realize how important our library is. Here we have over 11,000 books, not to mention the new pocket book collection. Every student is given the opportunity to use the numerous reference books or to browse before or after school and during his study period. Magazines and books of every type are made available for the personal use of student and teacher alike. However, we must remember that none of this efficiency would be possible if it weren't for the diligent efforts of our librarians.

*"Aw, gosh, it's too long to copy!"*

## AUDIO-VISUAL AIDS DEPARTMENT

*Mr. Frank Malesky*

Located in the rear of the library is a very busy and important department. It is one that assists teachers and students in classroom education.

The crew of 60 members, under the superior guidance of Mr. Malesky, does much to bring added pleasure to our daily routines.

The showing of films on subjects from home decorating to the splitting of the atom, is one of the many services performed. The projectionists run tape recorders, phonographs, and the other equipment that is such an asset to our education.

The Audio-Visual Aids Department does much to make our learning more interesting and enjoyable.
