

ELEMENTARY BIOLOGY CLUBS

Mrs. Friend
Mr. Froncek

For the student in Biology I who has a keen interest in biology and would like to further explore the avenues of plant and animal life beyond the classroom level, the Biology Club gives the opportunity to do this. Under the qualified advisorship of Mrs. Friend and Mr. Froncek, the students plan special projects, such as blood testing or, perhaps, a field trip to a medical center or museum.

LATIN CLUB

Mr. Quinn

Improvement of cultural knowledge and language ability are among the aims of the Latin Club.

The famous banquet is one of the highlights of the year. At this time, the underclassmen serve the upperclassmen, dressed in togas, of course. Many other activities, such as a field trip, are planned during the course of the year.

FIRST ROW, left to right: P. Babat, M. Stash, G. Sellner, R. Morel. SECOND ROW: B. Fumosa, H. Coombs, H. Redlund, J. Ball, D. Tobias. THIRD ROW: R. Huber, J. English, J. Hulsizer, R. Jenson.
