

"Now if I had six lemons . . ."

"Donald who?!!"

Miss Alvord

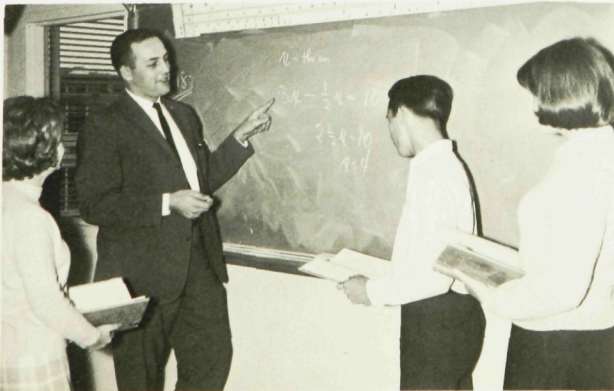

You don't have to be a mathematical genius to realize the fine work that the Math Department of S.P.F.H.S. is doing. Many math courses are being offered at S.P.F.H.S., and each one of them helps strengthen the students' backgrounds for college.

Algebra, Geometry, and Math Analysis are among the courses available. Math Analysis, which follows two years of Algebra and a year of Plane Geometry, covers such topics as Trigonometry and Calculus. Many new phases are being taught by our fine staff. This department delves deeply into the world of mathematics and enables the student to develop his mind.

MATHEMATICS DEPARTMENT

"What do you know, 1 plus 1 is 3."

"No, it doesn't mean three boxes of brand X!"
