INDUSTRIAL ARTS DEPARTMENT

Mr. Moore

Industrial Arts is a very worthwhile course for those who expect to enter the industrial world. There are four major fields in this department.

The familiar smells of turpentine and wood shavings in the back hall accompany the work of a busy wood shop class. Mechanical drawing teaches interested students graphic techniques. In metal shop the students utilize the tools made in first year class to further their skills in metal craft.

The last field, auto shop, enables interested boys to learn the entire workings of an automobile and how these parts function.

Hey! Aren't they in the wrong class?!

"This is the way we wash our hands"

"If he thinks I'm putting my hand in there . . ."
