

Student relaxes with *Hammond's International Atlas*.

Dolores Ibanez finds library atmosphere conducive to good research.

A Welcome Addition To Library-- A Copy Machine

There is a certain atmosphere of hushed, but busy concentration that is to be found in one room of our school, the library. Though not frequented by some, to others the library represents the search for information, and they know well the clatter of pens on table tops and the quiet sound of book sliding over book.

The library is in the process of continual change. It receives as many as one thousand new books each year, illustrating the fact that it is a department that is ever expanding and up to date.

A welcome addition is a copying machine which will act as a great time-saver for the student. Continuing to function effectively, the Library Council will present a special guest speaker, Miss Barbara Adams. A former student at the high school, Miss Adams received hundreds of books in the "Books for Africa" program.

The library has accomplished much and will continue to do so. By providing an atmosphere where the student is able to become lost in a world of fantasy or remain in one of realism, the library possesses a unique quality that is an effective aid in learning.
