

Students take advantage of "extra help" sessions offered by the Math Department after school.

"P-P-Pi over 2 . . ." Miss Alvord.

COMPUTERS COMPOSE LARGE SEGMENT OF MATH DEPARTMENT

Team teaching has been introduced in a large scale in the Mathematics Department this year. Extending last year's General Mathematics II team teaching program, this system is also being used with Algebra II and Math Analysis. Currently every Math teacher is a member of at least one team. All the classes of one subject are scheduled for the same period, enabling the entire group to meet for a team teaching session and allowing for different grouping of students according to abilities. Thus students can benefit from having several teachers and finding more individual help according to their needs, as well as offering more variety for student and teacher alike.

There is also more emphasis on computer programming this year as the computer begins its first full year of operation. Students have the opportunity to use the various machines in the Math Lab, and computer programming is being taught in some classes.
