The Language Department Encourages Individual Progress

The Language Department, chaired by Mrs. Arlene Krane, instituted new ideas and projects to broaden students' working knowledge of languages. Marking this year's progress were the addition of German and Russian II courses and a change of text series in the Spanish and French departments.

Emphasizing independent study, the department provided opportunities for students wishing to master a second language. Magazines, novels, newspapers and texts were supplied in the Foreign Language Independent Study Area. To add to the audio-visual aids available to the department, students were encouraged to write scripts and narrations to home movies and film strips, thus applying and expanding their own knowledge of the country and its language. Chaperoned by several language teachers, groups of SPFHS students toured Europe on an Easter holiday.

The Language Department hopes to continue and develop these projects, that students might attain greater fluency and extract more enjoyment from learning foreign languages.
