## mathematics department

... "seeking to stimulate joy in the study of mathematics". . . .

... providing a stimulating program for students of all levels . . . a new course: math foundations . . . new patterns in thinking . . . what's an apl? . . . putting mathematics to practical use . . . "a more human approach" . . . since when do math and bridges go together? . . . math independent study equals one crowded room . . . boys/girls=20/1 . . . quinto, a glorified math scrabble . . . who stole all the cubic marbles? . . . puzzles . . . games . . . traditional books . . . calculus course! . . . programma 101 . . . twist . . . who can find the different square? . . . geometry . . . "in 62 moves? — you must be kidding!"

... an improved curriculum . . . a different perspective . . . conventional math with a new twist . . . improving channels of understanding . . . bettering the goal of education. . . .

"isn't it kinda hard to count with your finger in your mouth?"  
chetta sangiacomo, linda pielhau.
