

# ... *A Time to Experience*

... beyond classrooms and books ... a time to follow our emotions ... seeking ways to express ourselves ... revealing ideas and feelings ... finding a place to plant the seeds of our interests ... letting them grow and branch out ... overlapping with interests of others ... conveying our personalities through creativity and participation ... a time to experience ... opening eyes, ears, and minds to the efforts and accomplishments of those around us ... releasing a surging energy ... contributing, sharing ... giving a bit of ourselves to the school ... learning from each other ... each of us singing his own song ... in harmony...
