ADMINISTRATION

The establishment of a close relationship between the Administration and students has enhanced the educational and social environment of S.P.F.H.S. this year. Although faced with a major cut in the school budget and subjected to much criticism from parent groups, the Administration continued to maintain a close rapport with both the school and community. Open Lunch and open end day, two programs instituted last year, allowed students to leave the school grounds for lunch periods and come in late or leave early during unassigned time. The Administration, together with the Student Council, organized a program entitled Citizens Observe Modern Education. Parents were invited to the school to tour the building, visit classrooms, and ask questions of the Administration. Through communication and involvement the Administration endeavors to stimulate progress and create a sound educational atmosphere among the students, faculty, and community.
