## ENGLISH DEPARTMENT

In an effort to increase students' awareness of the English language, the English Department has designed a program which exposes all aspects of reading and writing. The department's curriculum includes courses in British, American, and World Literature. Much emphasis is placed on plays and novels, writing compositions, and class discussions. Under the program developed last year, Seniors elect two mini-courses for the second semester, replacing the traditional full year of English IV. The department utilizes team teaching in level three and level four classes. By developing new methods, the English Department strives to stimulate the imagination and the creativity of the students.
