

"An ostrich ran off with my what?" Virginia Kurek.

*"You mean Math teachers aren't supposed to wear geometric print shirts?"
Raymond Levandowski.*

"Do pages 58, 1-10, 59, 2-52 . . . and by the way, Happy Holidays." Robert Lebr.

MATHEMATICS DEPARTMENT

The broadening of course choices in the Mathematics Department allowed sophomores to elect Geometry and Algebra II for either four or five times a week. The new option proved successful since ten out of twenty-three classes were meeting five periods a week. Also the Mathematics Department curriculum continued to contain many traditional mathematics courses in various levels. APL classes were continued even though the number of computer terminals was reduced from two to one.
