

*"If you had to read fifty papers on "The Innocence of High School Adolescents", you would be laughing also." Lynette Birkins.*

## HEALTH and PHYSICAL ED. DEPARTMENT

The Health and Physical Education Department was one of the more advanced in N.J. as it had a completely elective program. The students could choose from eight courses ranging from football to modern dance. Because of limited staff the gym classes, some of which were taught by Health teachers, were increased in size. The Health Department saw the institution of a new department policy which changed from a pass/fail to a letter grade marking system.
