

# INDUSTRIAL ARTS DEPARTMENT

The Industrial Arts Department curriculum was divided into three major types of programs — industrial, vocational, and special education courses. The Industrial Arts Department remained proud this year of what it considered the most thorough program in the state. This included the I CAN corporation of SPFHS, courses offered in wood and metal working, drafting and automechanics which served as an introduction to possible careers, and education of consumers. Vocationally the department offered a half-day work program, Work Experience Career Exploration Program, a half-day of training at Union County Technical Institute and the Cooperative Industrial Education program.

*"If only I could find my Dick Tracy two way radio I could contact Dr. Riegel." Russell Herbert.*

*"This is NOT my seventh coffee break today, it's only my sixth!" Vito Cupoli.*
