

The 1979 - 1980 school year has proved to be a major period of "review and assessment" for the Social Studies Department according to Mr. Cancelli, the chairperson. Their primary goal has been to augment class studies by promoting extensive use of the Social Studies Learning Resource Center. The department is extremely proud of their resource center. It serves as an extension for classroom activities where, to date, over 700 students a month have used the books, magazines, and newspapers available in the area.
