"Most of what goes on you guys can't print." "It's a new adventure every day."

With the largest department of its kind in the school, the Special Education department can boast of some outstanding work this year. Through its seven full-time and one part-time resource rooms, students could receive help in any subject from History to Algebra. The department runs one "adjustment class", and an adaptive physical education class, as well as three classes for the perceptually impaired. The department gives their special attention to over one hundred students, and can be proud of a job well done.

Mrs. Lehr and Mike in conference.
